SUMMARY

A Fullstack Engineer with 2 years of hands-on experience in developing and maintaining web. I've successfully completed 9 projects, focusing on building responsive, high-performance solutions using modern technologies like React, Next Js, NestJs and Node.js. I'm passionate about clean code, reusable components, and collaborating with teams to deliver scalable, real-world applications.

SKILLS

React Js Tailwind CSS Zustand Next Js Nest Js TypeORM Rest Api Git/Github Ethers.js
GraphQL React query

EXPERIENCE

Fullstack Engineer | Contract

Affirmdata

2024 - 2025 United States

TaskMe

- Migrated the website builder from Bubble to Next.js and Tailwind CSS.
- Developed timesheet tracking, job management, and invoicing features for freelancers and employers.
- Collaborated with the team on both frontend and backend development.
- Integrated Zustand for efficient and scalable state management.
- Built reusable components and implemented lazy loading to enhance performance.
- Implemented infinite scrolling and skeleton loading for smoother user experience.
- Configured and integrated NextIntl to enable locale-based internationalization.
- Utilized TypeScript throughout development for type safety, scalability, and improved documentation.

Fullstack Engineer | Full-time

Mobii PH

2024 - 2025 Philippines

Mini dapp

- Developed the frontend using a single-page application (SPA).
- Built reusable content-rendering components and optimized performance with useMemo, memo, and useCallback.
- Contributed to debugging, testing, and performance improvements.
- Successfully deployed and scaled the application, contributing to over 200k+ users overall.

Futr main

- Converted Figma designs into a responsive web application using Next.js and Tailwind CSS.
- Developed a scalable blockchain chain-switcher component for frontend and backend integration.
- Integrated Ethers.js to handle blockchain transactions, including buy, sell, reward distribution, and balance retrieval.
- Integrated RESTful APIs in NestJS for efficient data fetching and manipulation.
- Utilized React Query for optimized data fetching, revalidation, and caching to enhance application performance.
- Implemented drag-and-drop functionality for social profile customization.
- Collaborated with the team across frontend and backend development.
- Onboarded new developers and contributed to project documentation.
- Debugged and resolved issues to improve system reliability.
- Actively collaborated with the team to enhance product stability and performance.

Waitlist pages

- Redesigned and optimized the landing page for improved performance and user engagement.
- Implemented a carousel component using ShadCN UI.
- Enhanced mobile responsiveness.
- Integrated GetWaitlist third-party service to track registered users.

Frontend Engineer | Freelance

1TechHub

2023 - 2025 Australia

Admin Dashboard

- Structured and developed the entire project codebase from scratch.
- Converted Figma designs into a fully functional web application using Next.js and Tailwind CSS.
- Implemented backend endpoints supporting pagination, queries, and filtering.
- Leveraged Zustand for state and data management.
- Integrated REST API endpoints for dynamic data handling.
- Collaborated with the team lead on feature planning and implementation.

Frontend Engineer | Freelance

Strateji

2023 - 2025 Australia

Strateji

- Converted Figma designs into production-ready UI components.
- Enhanced UI consistency and resolved design discrepancies.
- Developed a mind map card feature with create, update, view, and delete capabilities.
- Integrated RESTful APIs in NestJS for data fetching and manipulation.
- Implemented API endpoint for AI-generated content.
- Collaborated with the team lead on feature improvements and integration.

TRAINING/COURSES

[CSS, Bootstrap And JavaScript And Python Stack Course](#)

Completed a comprehensive course on Udemy, covering CSS, Bootstrap, JavaScript, and the Python stack, 2023

[PyScript Fundamentals 101- Run Python in your Browser's HTML](#)

Completed the PyScript Fundamentals 101 course, learning how to run Python directly in the browser's HTML, enabling seamless integration of Python with web applications for interactive, client-side functionality. 2023

[Front End Development Libraries](#)

Learned the basic fundamentals of frontend development with its libraries, 2023

[Responsive Web Design](#)

Learned the responsive design with css using media query, 2023
