SUMMARY

A Fullstack Engineer with 2 years of hands-on experience in developing and maintaining web. I've successfully completed 8 projects, focusing on building responsive, high-performance solutions using modern technologies like React, Next Js, NestJs and Node.js. I'm passionate about clean code, reusable components, and collaborating with teams to deliver scalable, real-world applications.

SKILLS

React Js Tailwind CSS Zustand Next Js Nest Js TypeORM Rest Api Git/Github Ethers.js

GraphQL

EXPERIENCE

Fullstack Engineer | Contract

Affirmdata

2024 – 2025 United States

TaskMe
- Integrated the login, registration, forgot password, and email verification endpoints and UI.
- Converted the Bubble-based website to Next.js, enhancing application performance and scalability using Next.js, Tailwind CSS, and Apollo GraphQL.
- Performed backend adjustments to fix missing return data and incomplete endpoints.
- Designed and developed the time tracking feature from end to end, handling both frontend and backend development.
- Conduct a demonstration of the application.
- Collaborated with the team on development tasks and feature implementation.

Fullstack Engineer | Full-time

Mobii PH

2024 – 2025 Philippines

Mini dapp
- Integrated LIFF (LINE Front-end Framework) to support both LINE and non-LIFF users for seamless communication.
- Translated Figma user flows into a fully responsive and functional web application.
- Collaborated with developers to implement custom user registration logic tailored to Kaia team's requirements.
- Developed reusable components, delivered new features, and continuously optimized performance.
- Provided ongoing support by promptly addressing bugs and production issues.
- Successfully deployed and scaled the application, contributing to over 200k+ users overall.

Futr main
- Maintained and improved the application by adding new features and optimizing existing ones.
- Integrate smart contract with ethers js in frontend
- Implemented a dynamic multi-chain solution that adapts based on the user's selected blockchain network, and designed the configuration logic to ensure scalability and maintainability.
- Created reusable components to enhance development efficiency and maintainability.
- Integrated APIs to ensure smooth data exchange and functionality.
- Collaborated with developers, UI/UX designers, and the CEO to align development efforts with business goals and user needs.
- Helped onboard new developers, providing guidance and support for smooth integration into the team.
- Added backend features and fixed issues related to missing return data, improving overall app functionality and reliability.
- Used App Router for routing to take full advantage of Next.js features and improved routing flexibility.

Waitlist page
- Implemented waitlist pages for Futr Main and MyUse.
- Integrated the GetWaitlist dashboard for easy implementation and tracking of registered users.

Frontend Engineer | Freelance
1TechHub

2023 – 2025 Australia

Admin Dashboard
- Implemented Figma flow into a responsive web application.
- Used Zustand for efficient API state management.
- Created reusable components and utilized TypeScript for better maintainability and future developer collaboration.
- Collaborated with senior developers to address issues in backend response
- Maintained the application and added new features to meet evolving requirements.
- Conducted thorough testing before pushing changes to ensure code quality and minimize issues.

TRAINING/COURSES

CSS, Bootstrap And JavaScript And Python Stack Course

Completed a comprehensive course on Udemy, covering CSS, Bootstrap, JavaScript, and the Python stack, 2023

PyScript Fundamentals 101- Run Python in your Browser's HTML

Completed the PyScript Fundamentals 101 course, learning how to run Python directly in the browser's HTML, enabling seamless integration of Python with web applications for interactive, client-side functionality. 2023

Front End Development Libraries

Learned the basic fundamentals of frontend development with its librarires, 2023

Responsive Web Design

Learned the responsive design with css using media query, 2023
